---

binary_peaks *Find binary peaks*

Description

Find binary peaks

Usage

```
binary_peaks(df, neighbors, error = 0)
```

Arguments

df	Data frame of m/z and intensities
neighbors	Number of neighboring m/z values to compare on right and left
error	m/z measuring error parameter

Examples

```
binary_peaks()
```

---

round_df *Round data frame*

Description

Find the intensity peaks

Usage

```
round_df(df)
```

Arguments

df	Data frame

Examples

```
integer_round_df()
```
